

# AdiabaX Connector

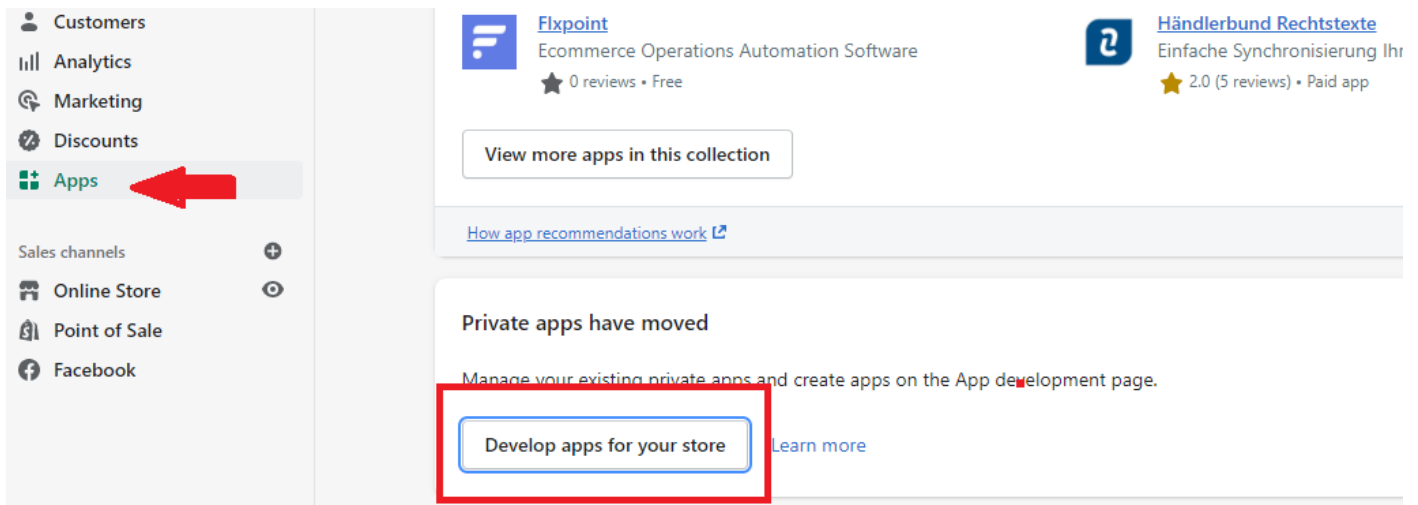

## Shopify Private App and Webhook

Create a Shopify Private App .....	2
Activate Shopify Orders Webhook (for orders synchronization) .....	6

*Adiabax can support you in this task; in order to manage this activity, a temporary user with administrator or partner role must be assigned to Adiabax Support.*

## Create a Shopify Private App

- From Menu Apps -> Develop apps for your store

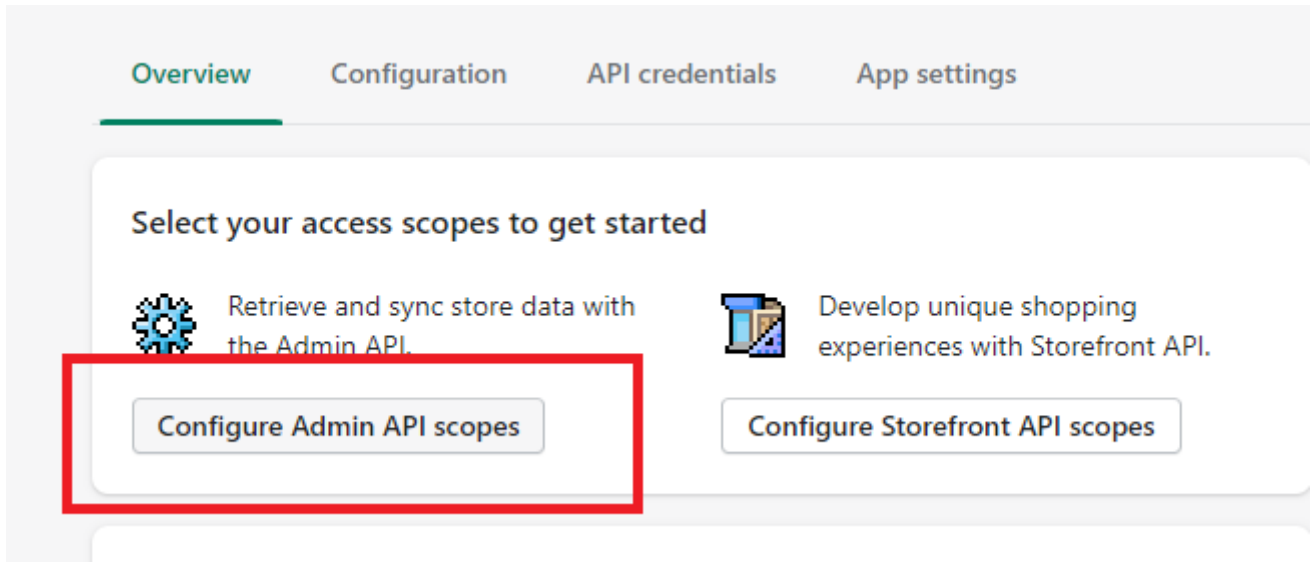

- Click on Create an app

- Insert private app name: AdiabaxShopyConnector
- Insert developer mail: [support@adiabax.it](mailto:support@adiabax.it) (or your email)
- .. and Create app

- Configure Admin Api Permissions

- Activate following Admin Api permissions
  - **Customers:** Read and write
  - **Inventory:** Read and write
  - **Locations:** Read
  - **Orders:** Read and write
  - **Products:** Read and write

- Choose latest Webhook subscription and Save

**Webhook subscriptions**

Event version

2022-04 (Latest)

If your app creates a webhook subscription, it'll use this API version.

Google Cloud Pub/Sub

Subscribe to events using [webhooks](#) , or use a cloud service to scale your event integration.

[Work with versioned webhooks](#)

[Start using Google Cloud Pub/Sub](#)

[Start using Amazon EventBridge](#)

Cancel Save

- Install App

Overview Configuration **API credentials** App settings

**API credentials**

**Access tokens**

You don't have any access tokens yet. To get your Admin API access token, install your app.

Install app

- Copy and save your Admin API access token in a secure place

**Admin API access token** New

Use your access token to request data from the [Admin API](#) .

 To protect your data, you'll only be able to reveal your Admin API token once. Copy and save your Admin API access token in a secure place.

## Activate Shopify Orders Webhook (for orders synchronization)

- From your Shopify Dashboard click on Settings

- Notifications

- Go to Webhook section and click on Create webhook

### Webhooks

You can subscribe to events for your products and orders by creating web hooks that will push XML or JSON notifications to a given URL.

Create webhook

- Insert and save:
  - **Event:** Order update
  - **Format** JSON
  - **URL:** [https://www.ypip.it/cgi-bin/pas/adv\\_shp/adv\\_shp\\_orders.py](https://www.ypip.it/cgi-bin/pas/adv_shp/adv_shp_orders.py)
  - **Webhook Api version:** choose the latest
