

## Adiabax ShopyAdvarics: location mapping

Where to find the Shopify location configuration.....	2
How to map locations with Advarics stores.....	4

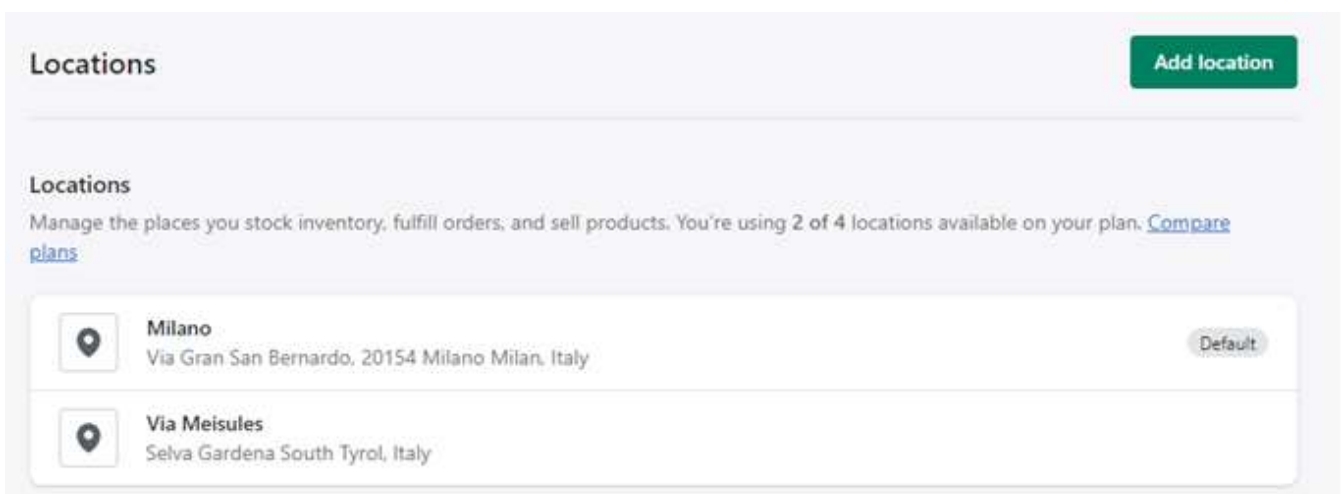

*Adiabax can support you in this task; in order to manage this activity, a temporary user with administrator or partner role must be assigned to Adiabax Support.*

## Where to find the Shopify location configuration

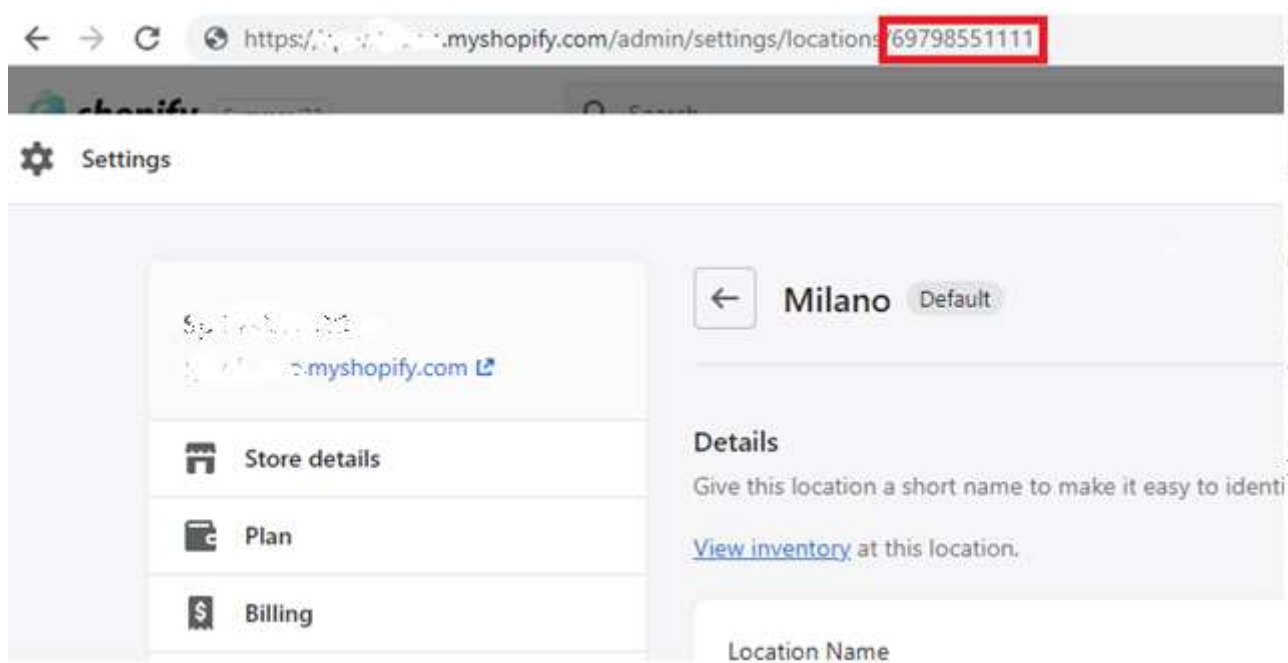

- From Menu **Settings** -> **Locations**

- You will find the list of locations with the default one (attention, inactive locations are not considered)

- To find the location ID, click on the location name and copy the number you will find in the URL

## How to map locations with Advarics stores

- If you have only one location choose **Single** in the connector settings; no other information is required

Shopify Locations   Single  Default  Multi location

- If you have more than one location but would rather have the **stock assigned to the default location** only, choose Default and enter the location ID of your default Shopify location

Shopify Locations   Single  Default  Multi location
